In 1640 Europe was a term without precise political significance. In the ensuing years the idea of Europe came to mean more. The Making of Modern Europe 1648-1780 is a thoroughly comprehensive account of this period. It: \* traces the evolution of the developing society \* presents detailed studies of the people, their environment, attitudes and beliefs \* examines economic aspects \* focuses on the growth of states \* addresses issues of politics, war and diplomacy \* includes chapters on religion, intellectualism and science The work provides an excellent basis for the study of seventeenth and eighteenth-century European history. Since its publication in 1987 early Modern Europe (1500 - 1789) has become a bestselling, well-loved classic. Opening at the climax of the Renaissance - when an educated, city-based laity began to bring their special demands and sensibilities to bear on earlier traditions the book chronicles the dawning of a new age on the continent. Combining the freshness of an interpretive essay with the breadth of wide-ranging historical synthesis, Koenigsberger paints a detailed picture of the Reformation and its significance as increasingly powerful nations began to intrude on their subjects' public and private lives. The text ends with a discussion of the conflicts between personal freedom and the rights of authority that shattered forever the old European order. Early Modern Europe 1500 - 1789 was originally published as the

central volume in the bestselling illustrated Series, 'A History of Europe', edited by H G Koenigsberger and Asa Briggs, charting Europe's history from the collapse of the Roman Empire to modern times. This book presents a case study of Europe's impact on an old and distinctive non-European civilisation. Part One deals with the elements in Europe's strength, technological, political and intellectual. It also uses Wallerstein's world-systems perspective to give an economic dimension to this picture of the new world of Europe, and then looks at the important question of the changing place of the Dutch in the new economic order from the seventeenth to the eighteenth century. This is followed by a brief account of the history of the Dutch East-India Company in Java, and its political effects. Part Two deals with the nature of the Javanese ancien regime, both in court and in provincial circles, with a focus on society and civilisation, rather than those staples of Javanese historiography to date, political events and economic statistics. Part Three deals with the overall pattern set by the VOC's changing economic imperatives and with the impact of the successive tides of capitalism on three regional societies of Java. Part Four deals with intellectual shifts that took place in this period, and argues that these shifts were less conservative than the socio-economic ones described in Part Three and, though more fragile and vulnerable, were crucial for the future. The conclusion attempts to show the significance of these developments for modern Indonesia and the way in which some of the dynamics begun in this period are being played out in the contemporary world.

Interpreting Early Modern Europe is a comprehensive collection of essays on the historiography of the early modern period (circa 1450-1800). Concerned with the principles, priorities, theories, and narratives behind the writing of early modern history, the book places particular emphasis on developments in recent scholarship. Each chapter, written by a prominent historian caught up in the debates, is devoted to the varieties of interpretation relating to a specific theme or field considered integral to understanding the age, providing readers with a 'behind-the-scenes' look at how historians have worked, and still work, within these fields. At one level the emphasis is historiographical, with the essays engaged in a direct dialogue with the influential theories, methods, assumptions, and conclusions in each of the fields. At another level the contributions emphasise the historical dimensions of interpretation, providing readers with surveys of the component parts that make up the modern narratives. Supported by extensive bibliographies, primary materials, and appendices with extracts from key secondary debates, Interpreting Early Modern Europe provides a systematic exploration of how historians have shaped the study of the early modern past. It is essential reading for students of early modern history. Students and instructors alike praise A History of Modern Europe for its authoritative coverage from the Renaissance to the present day. Written in Merriman's signature narrative style, the book is brightened with humor and biographical sketches. The Fourth Edition reflects the latest scholarship while placing special emphasis on the theme of war and society. A new full-color design features a completely redrawn map program and new pedagogical and teaching tools. This is the first study to analyze a wide spread of price data to determine whether market development led to economic growth in the early modern period. As one of the most influential ideas in modern European history, democracy has fundamentally reshaped not only the landscape of governance, but also social and political thought throughout the world. Democracy in Modern Europe surveys the conceptual history of democracy in modern Europe, from the Industrial Revolutions of the nineteenth century through both world wars and the rise of welfare states to the present era of the European Union. Exploring individual countries as well as regional dynamics, this volume comprises a tightly organized, comprehensive, and thoroughly up-to-date exploration of a foundational issue in European political and intellectual history. Osprey's study of the most famous battle of the Napoleonic Wars (1799-1815). Waterloo holds a special place among the great battles of history. The climax of more than twenty years of war, it

was indeed a close-run affair, matching two of the world's greatest generals - Napoleon and Wellington. This volume covers the entire campaign including the battles of Quatre Bras, Ligny and Wavre, with five full-colour maps and three highly detailed bird's eye views showing decisive moments in the action. An excellent sense of the closeness of the battle is communicated - Wellington himself claimed it was "the nearest thing you ever saw in your life" - and this gripping account shows the full justice of that statement. From the monarchical terror of the Middle Ages to the mangled Europe of the twenty-first century, *A People's History of Modern Europe* tells the history of the continent through the deeds of those whom mainstream history tries to forget. Europe provided the perfect conditions for a great number of political revolutions from below. The German peasant wars of Thomas Müntzer, the bourgeois

revolutions of the eighteenth century, the rise of the industrial worker in England, the turbulent journey of the Russian Soviets, the role of the European working class throughout the Cold War, student protests in 1968 and through to the present day, when we continue to fight to forge an alternative to the barbaric economic system. By focusing on the role of women, trade unions and students, this history sweeps away the tired platitudes of the privileged upon which our current understanding is based, providing an opportunity to see our history differently. Available in both one-volume and two-volume paperback editions, *A History of Modern Europe* presents a panoramic survey of modern Europe from the Renaissance to the present day. A single author lends a unified approach and consistent style throughout, with an emphasis on the connections of events and people over time. The Third Edition, like the two before it, is authoritative and up-to-date. New to the Third Edition is the theme of empire. From the imperial rivalries between France and Spain in the sixteenth and seventeenth centuries, through the rise and fall of the Ottoman Turkish empire, and on into the imperial history of the twentieth century—decolonization, the spread of the Soviet empire, and the imperial power of the United States—the theme of empire helps students find commonalities among the events of European history. For Students of B.A, M.A and also useful for competitive examinations *Muslims and the Making of Modern Europe* shows that Muslims were citizens of modern Europe from its beginning and, in the process, rethinks Europe itself. Muslims are neither newcomers nor outsiders in Europe. In the twentieth century, they have been central to the continent's political development and the evolution of its traditions of equality and law. From 1878 into the period following World War II, over a million Ottoman Muslims became citizens of new European states. In *Muslims and the Making of Modern Europe*, Emily Greble follows the fortunes and misfortunes of several generations of these indigenous men, women and children; merchants, peasants, and landowners; muftis and preachers; teachers and students; believers and non-believers from seaside port towns on the shores of the Adriatic to mountainous villages in the Balkans. Drawing on a wide range of archives from government ministries in state capitals to madrasas in provincial towns, Greble uncovers Muslims' negotiations with state authorities—over the boundaries of Islamic law, the nature of religious freedom, and the meaning of minority rights. She shows how their story is Europe's story: Muslims navigated the continent's turbulent passage from imperial order through the interwar political experiments of liberal democracy and authoritarianism to the ideological programs of fascism, socialism, and communism. In doing so, they shaped the grand narratives upon which so much of Europe's fractious present now rests. *Muslims and the Making of Modern Europe* offers a striking new account of the history of citizenship and nation-building, the emergence of minority rights, and the character of secularism. Students and instructors alike praise *A History of Modern Europe* for its authoritative coverage from the Renaissance to the present day.
