Provide your students with frequent, focused skills practice with this Reproducible Teacher's Edition. The reproducible format and additional teacher resources give you everything you need to help students master and retain basic skills. "Geography, a tapestry of journal entries, choreographic scores, drawings, and photographs, leads us through the creation of an evening-long dance, "Geography," a collaboration about being American, African, brown, black, blue black, male, and artist. This dance piece was a major departure for Ralph Lemon. In it everything is at stake - his identity, his politics, his art, his very way of moving. In order to create it, he traveled to Africa in search of dancers and a new relationship to the stage." "The intimate, keenly observed passages in this artist's journal give us extraordinary insights on the process of dance-making - from the discovery of specific movements to the sometimes uneasy relationships between the dancers. At every juncture the collaboration posed difficult questions about representing African dance and culture within the context of modern America's post-slave heritage. The book beautifully documents Lemon's ability to negotiate different dance traditions without either erasing or cementing them."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. All Rights Reserved In *How to Homeschool the Kids You Have*, three veteran home educators lead you through the process of creating a custom educational plan that works for your family's unique situation and your children's needs. You'll identify your own educational priorities and learn how to translate them into a strong academic program. You'll also learn about what science tells us about how humans- especially young humans-learn, and why that information is crucial for the success of your homeschooling plans. Along the way, the authors share their own experiences and those of other homeschoolers to help you avoid pitfalls so you can provide your children with the excellent education that is their birthright. Give your fifth-graders the fun and focused writing practice they need to become to become strong and successful writers. The 125 engaging, 10- to 15-minute lessons support any writing program. The purpose of Daily geography is to increase students' knowledge and understanding of physical and political aspects of the world as these aspects relate to geography. In *Daily Geography Practice, Grade 2*, 36 map lessons introduce basic geography skills and over 80 geography terms. What a perfect hands-on approach to geography instruction! Lesson plans and activities to teach science to elementary level students. Critical thinking skills are more important than ever in academic and real-world situations. Daily Higher-Order Thinking provides you with daily activities that build and grow students' problem-solving skills in engaging formats such as logic and visual puzzles, brainteasers, creative writing, picture comparison, word play, and "what if" questions. Daily 20-minute practice lessons help students apply critical thinking skills across subject areas. The lessons develop students' higher-order thinking skills and allow them to integrate their learning and make deeper connections between their learning and the real world.

Use Daily Higher-Order Thinking for warm-up exercises, extension activities, early finisher tasks and small-group center activities to develop your students' critical and creative thinking skills. How it works: - Monday-Friday: Full-page daily activities focus on a specific behavioral verb each day. The verb is defined at the top of the page so students become aware of when and how they are using the thinking skill. - Each full-page activity gives students an opportunity to practice a higher-order thinking skill in the context of a different curriculum area. - Questions and tasks are open-ended and can be used to promote peer-to-peer discussions as students share and discuss answers, while also fostering critical thinking skills. - An answer key provides sample responses for each day's activities. Evaluate students' responses based on your own expectations and on what content your students have encountered. Grade 1 activities include: logic puzzles, language play, creative writing, drawing, and visual brainteasers. Daily lessons practice higher-order thinking skills such as: - Comparing - Grouping - Identifying - Inferring - Solving Lesson plans and activities to help teach basic science to elementary school level students. "Comprises ten weekly sections that provide skill practice in several subject areas, including reading, mathematics, spelling, language skills, handwriting, creative writing, and geography."--Provided by publisher.
